## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-52, drawn to a composition comprising a non-volatile hydrocarbon based oil, a non-volatile silicone compound, an inert particulate phase and a dispersant, classified in class 424, subclass 401, and class 514, subclasses 424, 75, 557, 546, 506 for example.
- II. Claims 53-57, drawn to a method of caring for or making up the lips or skin and/or preserving its gloss and/or making the film comfortable to wear, class 424, subclass 401, and class 514, subclasses 424, 75, 557, 546, 506 for example.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case skin or lips could be cared for by a composition consisting of petroleum jelly.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

### ***Specie election***

Claims 1-57 are generic to a plurality of disclosed patentably distinct species

comprising different non-volatile hydrocarbon based oils and claims 11-23, 36-37, 54 and 57 are generic to a plurality of disclosed patentably distinct species of dispersants.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species , even though this requirement is traversed. Claims 1-57 as presented contain such a vast multitude of possibilities and permutations of non-volatile hydrocarbon based oils and claims 11-23, 36-37, 54 and 57 contain such a vast multitude of possibilities and permutations of dispersant and combinations thereof that the search for each and every species encompassed in the claims classified in different subclasses of class 514, e.g., 75, 424, 506, 546, 557, present an undue burden on the office. Accordingly, a requirement to provisionally elect a single independent and patentably distinct species is made as provided for in MPEP 803.02. These species are considered to be distinct inventions since the species are so diverse and unrelated structurally that a reference anticipating one of the species would not anticipate or render obvious the other species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, **one specific dispersant and one specific non-volatile hydrocarbon based oil**, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that in order for the reply to this requirement to be complete it must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mojdeh Bahar whose telephone number is (703) 305-1007. The examiner can normally be reached on (703) 305-1007 from 8:30 a.m. to 6:30 p.m. Monday, Tuesday, Thursday and Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan, can be reached on (703) 305-1877. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
